

Surfaces and interfaces I

Chair(s): J O'Shea (University of Nottingham, UK)

Wednesday 15 December 2010

- 10.50 Invited: Ligand adsorption on iron phthalocyanine: adsorption sites, substrate decoupling, and spin state modification**
J Schnadt (Lund University, Sweden)
- 11.20 Epitaxial palladium ultra-thin film on Re**
H Etman (University of Reading, UK)
- 11.35 Water - oxygen interactions at the Ni{111} surface**
R Nicklin (University of Reading, UK)
- 11.50 Charge transfer dynamics of model charge transfer centres of a multi-centre water splitting dye complex on rutile TiO₂(110)**
M Weston (University of Nottingham, UK)
- 12.05 The surface electronic structure of β-Ga₂O₃**
M Mohamed (Institut für Physik, Humboldt-Universität zu Berlin, Germany)
- 12.20 Liquid dielectrophoresis: electrospreeding and liquid optics**
C Brown (Nottingham Trent University, UK)
- 12.35 Micro-wrinkled bilayer structures with gradient wetting properties**
K Langley (University of Nottingham, UK)
- 12.50 End of symposia**
